**RE: Support for Dungeness Streamflow Restoration Off-Channel Reservoir Project**

To Whom It May Concern:

The Dungeness River Management Team (DRMT) reaffirmed its strong support for the Dungeness Off-Channel Reservoir Project with a detailed *Resolution in Support of the Dungeness Flow Restoration and Aquifer Recharge Off-Channel Reservoir* (please see attached).

The DRMT, the long-standing (32-year!) watershed council for the Dungeness Watershed, has a strong history of supporting and coordinating water conservation efforts in this watershed, as documented in *History of DRMT support of streamflow enhancement, storage, and aquifer recharge* (please see attached).

These attached documents reflect our ongoing commitment to better water resource management for all, and especially now, at a time when decreasing snowpack storage and critical low flows in the Dungeness and other Washington watersheds are reoccurring themes.

We appreciate your serious consideration of funding this important project to benefit fish, farms and people.

Sincerely,

Hansi Hals, Chair, DRMT  
On behalf of the DRMT
